PROFILE

MSc Computer Science graduate with hands-on experience in data analysis, Python, SQL, Power BI, and machine learning. Delivered data-driven solutions across operational, commercial, and business intelligence environments — building dashboards, automating reporting workflows, developing predictive models, and presenting actionable insights to senior stakeholders. Strong analytical and problem-solving skills, with excellent attention to detail and the ability to communicate complex findings clearly to both technical and non-technical audiences. Available immediately and willing to relocate anywhere in the UK. Open to roles in Data Analysis, Business Intelligence, Data Science, and Graduate Analyst programmes. UK Graduate visa from September 2026 — full right to work, no employer sponsorship required.

TECHNICAL SKILLS

Data Analysis & BI: Python (Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Selenium), SQL (complex querying, extraction, manipulation), Power BI (DAX, KPI dashboards), Tableau

Machine Learning: Predictive modelling, classification, regression, clustering, feature engineering, model evaluation, A/B testing, statistical analysis

Reporting & Automation: Excel (pivot tables, VLOOKUP, advanced formulas, macros), automated reporting pipelines, ETL processes, CSV automation, Power Query

Platforms & Tools: Jupyter Notebook, Git, Google Colab, database design, data governance, GDPR compliance, cloud platforms (Azure/BigQuery — familiar)

WORK EXPERIENCE

Software & Data Intern | *Tees Maritime Cluster, Middlesbrough* Sep – Dec 2025

- Designed and built automated reporting pipelines, role-based dashboards, and ETL workflows — delivering real-time performance visibility across operational, academic, and employer stakeholder groups.
- Developed Power BI dashboards tracking KPIs across multiple user cohorts, enabling data-driven decisions for senior stakeholders and contributing directly to strategic planning for the programme.
- Implemented GDPR-compliant data architecture with encrypted storage, role-based access controls, and data governance principles — maintaining integrity and compliance across all reporting outputs.
- Automated CSV and Excel reporting workflows using Python (Pandas, Selenium), reducing manual processing time significantly and improving consistency of analytical outputs across the team.

Data Analytics Intern | *Uptrail Ltd (Remote), UK* Jul – Aug 2025

- Delivered end-to-end data analysis projects using Python and SQL, identifying trends, patterns, and commercial opportunities in large business datasets and translating findings into clear strategic recommendations.
- Built and maintained interactive Power BI dashboards with KPI tracking, dynamic filtering, and drill-down capabilities — giving commercial, marketing, and product teams real-time visibility into business performance.
- Presented data-driven insights and recommendations to senior stakeholders, communicating complex analytical findings clearly to both technical and non-technical audiences.
- Awarded Certificate of Excellence** — recognised for outstanding analytical performance, technical proficiency, and collaborative contribution throughout the programme.

TECHNICAL PROJECTS

- Customer Churn Prediction (Python, Scikit-learn):** Built a machine learning classification model achieving 85%+ accuracy; applied feature engineering, statistical analysis, hyperparameter tuning, and model evaluation using ROC curves and confusion matrices.
- Sales Dashboard (Power BI, DAX):** Developed a business intelligence dashboard with DAX measures tracking Total Sales, Average Order Value, Sales Growth Rate, and Customer Lifetime Value.
- Sales Data Analysis & Automation (SQL, Excel, Python):** Analysed large sales datasets using SQL to identify regional trends and revenue patterns; automated monthly KPI reporting using pivot tables, VLOOKUP, and macros.

EDUCATION

MSc Computer Science | *Teesside University, Middlesbrough* 2024 – 2026
Modules: Big Data & Business Intelligence, Machine Learning, Artificial Intelligence, Cloud Computing, Advanced Data Structures, Research Methods

BSc Information Technology | *Anil Neerukonda Institute of Technology & Sciences* Aug 2019 – May 2023

CERTIFICATIONS

Google Data Analytics Professional Certificate (in progress) | IBM Machine Learning Professional Certificate | Microsoft Power BI (self-study) | Introduction to Data Analytics & Data Science – Simplilearn
